SUBJECT INDEX

A

ABO blood group
  and genetic transmission of disease, 28
Absenteeism
  and exercise programs, 244
  and health promotion programs, 110
Addison's disease
  and HLA antigens, 31
Adoption studies
  disease distribution
    environmental influences on, 1
  and genetic epidemiology, 21–24
Adrenocorticoid carcinoma
  and genetic susceptibility, 12
Affective disease
  and genetic epidemiology, 9–10
Affective disorders
  and genetic epidemiology, 43
Age
  and genetic susceptibility to cancer, 13
AHA-Urban Institute Study
  and health care for the poor, 77
Airport noise
  and disease, 325–27
Air traffic controllers
  and stress, 333
Alcohol
  automobile insurance, 120
  and cirrhosis mortality, 308
  consumption
    as a business deduction, 127
    hazards to physical health, 295
  detoxification and treatment services, 74–75
  as a disease, 306
  and drowning, 181
  and legal drinking age, 125
  and mass media, 295
  Mothers Against Drunk Driving, 311
  and motor vehicle accidents, 228
  and price elasticity, 307–8
  programs at the worksite, 250
  societal policies, 296
  and stress, 330
  taxation, 123, 297, 304
  and US rate of alcoholism, 302
  youth indoctrination programs, 302–3
Alcohol control
  and public health
    controls in perspective, 310–13
    general theories of effects, 301–4
    governmental resistance to, 298
    new evidence on effects of, 306–10
    new perspectives, 294–96
    overview, 293–300
    recent literature on, 300–10
Alcoholism
  adoptive studies
    genetic transmission, 22
  alpha rhythms, 11
  and the developing fetus, 36
  environmental exposure, 26
  familial aggregation, 10
  and genetic epidemiology, 43
  and genetic susceptibility, 9–10
  insurance coverage of treatment, 120
  P 3 brain waves, 10
Alpha rhythms
  and alcoholism, 11
Amblyopia
  see Vision disorders
American Hospital Association (AHA)
  annual survey results, 202
  statistical data, 73
Anencephaly
  and genetic inheritance, 8
Anger
  and Type A behavior, 344–45
Angina
  and genetic inheritance, 4
Animal experiments
  carcinogenesis, 408
  and social stress, 429
Animal studies
  and cancer, 11
Antigens
  and leprosy, 6
Anxiety
  and heart disease, 326
Arthritis
  National Health Interview Survey, 97
  and trends data, 92
Aryl hydrocarbon hydroxylase (AHH)
  genetic susceptibility to lung cancer, 14
Asthma/hay fever
  national rates, 95
Astigmatism
  see Vision disorders
Autoimmune diseases
  susceptibility genes for, 44

B

Behavioral disorders
  adoption studies, 21–23
  and familial clustering, 1
  and genetic epidemiology, 9–11
Bereavement
  and mortality risk, 426
  and stress, 333–34
Bicycling
  and injury rates, 184–85
Biological life span
  and life expectancy, 90
Birth
  and fetal monitoring, 283
  home vs. hospital, 276
Birth defects
  and familial clustering, 1
  genetic inheritance, 7–9
Birth weight
  maternal effect on, 38
Blindness
  as a vision disorder, 378
Blood pressure
  and coronary heart disease
    familial association, 5
  cost of to employers, 241
  and genetic transmission, 23–24
  and health trends, 86
  path analysis in, 25
  and relation to marital status, 426
  as risk factors
    in health measures, 88
  screening programs, 241
  twins studies, 19–20
  and Type A behavior, 353
Brain tumor
  and genetic susceptibility, 16

Breast cancer
and environmental hypothesis, 35
and genetic epidemiology, 43
and genetic susceptibility, 12–13
and linkage analysis genetic research, 40
and pedigree analysis, 35–36
relation to ovarian cancer, 36
susceptibility to brain tumor, 16
Bronchitis/sinusitis
National Health Interview Survey, 97
Business
and the development of health care packages, 120

C

Cancer
dependency as a risk factor, 331
and depression as a risk factor, 331
of the eye, 377
and genetic epidemiology, 11–12
geographic target populations, 15
and human leukocyte antigen system (HLA), 29–30
mortality rates, 89
and nutritional habits, 246
and smoking, 242
stress risks, 330–31
see also Brain tumor
see also Breast cancer
see also Hodgkin's disease
see also Leukemia
see also Lung cancer
see also Ovarian cancer
see also Stomach cancer
Cardiovascular disease
and exercise, 244
and familial clustering, 1
and genetic epidemiology, 4–6, 43
indicators of risk factors, 88
mortality rates
sex differential in, 440–41
path analysis in, 24
and stress
literature on, 328–30
and trends data, 92
twins studies, 19–20
and Type A behavior, 343, 347–55, 360
Cataract
see Vision disorders diseases
Celiac disease
and HLA antigens, 30
Center's National Health and Nutrition Examination Survey
and mortality measures, 87
Children
and amblyopia, 373–74
bicycle injury, 184–85
brain tumors
association with epilepsy, 16
and cancer
genetic risks, 36
childhood disease
National Health Interview Survey, 93
reduction in, 85
trends in, 92–93
chronic illness, 100
and drowning, 181–82
and health promotion interventions, 224–28
and hyperopia, 371–72
and maternal epilepsy, 38
mother's prenatal health behavior, 224
and myopia, 370
and safety restraint laws, 124
and the social security act, 59
and strabismus, 373
as support system
to the elderly, 418
Type A behavior pattern, 357–58
and vision disorders, 369, 379–80
Cholera
epidemiologic investigations, 43
Cholesterol
employer sponsored reduction programs, 262
and genetic inheritance, 5
and hypercholesterolemia, 35
as risk factor
in health measures, 88–89
and stressful environment
as risk factor for disease, 325
and stress in tax accountants, 325
Chromosomal translocations
and leukemia, 16
Chromosome abnormalities
and brain tumors, 16
and cancer, 11
Chronic disease
National Health Interview Survey, 95
use of physician services, 97
Chronic illness
as a measure of health, 87
Church membership
and the Social Network Index, 416
Circulatory disease
National Health Interview Survey, 97
Cirrhosis
liver
and mortality from alcohol, 293
Clubfoot
and genetic inheritance, 38
Columbia University of Public Health
and public hospital services, 77
Commission on the Delivery of Health Services
1967 findings, 69
Commission of Public-General Hospitals
1978 report, 72–79
Common cold
decline in, 93
Communicable disease
national statistics trends, 86
Community
care for the poor and indigent, 56
Community hospital
definition of by AHA, 73
Congenital heart defects
and genetic inheritance, 38
Congenital malformations
and maternal factors, 37
Consanguinity
and inherited neural tube defects, 8
Contagious diseases
and the American pesthouse, 57
Coronary heart disease
diet, 5
and genetic epidemiology, 4–5
and serum lipids, 5
and social networks, 419
stress, 5
and Type A behavior, 329
Coronary-prone behaviors
and health statistics, 84
Cultural transmission
of disease, 17–32
Cystic fibrosis
and recessive inheritance, 33

D

Death
causes of premature, 239
violent
1982 data, 89
Decision analysis for public health

principles and illustrations, 135–60
analysis steps, 138
cost-benefit analysis, 147–48
discussion, 157–60
examples, 148–57
introduction, 136–37
principles, 137–38
summary, 135
techniques, 138–48
Dental disease
national statistics trends, 86
Dental health
short term trends, 91
Dependency
and cancer, 331
Depression
and cancer, 331
effect of on public hospitals, 79
and exercise programs, 244
and social networks, 415
and stress, 323
and Type A behavior, 355
DES
and vaginal adenocarcinoma, 280
Diabetes
association of alleles
and human leukocyte antigen (HLA) system, 3
and coronary heart disease
in familial aggregation, 4
and the developing fetus, 36
and diet, 247
and familial clustering, 1
and genetic epidemiology, 43
and health awareness trends, 86
history of detection, 2–3
and HLA antigens, 30–31
and hyperopia, 372
and inheritance
dominant mode of, 41–42
long term analysis, 98
National Health Interview Survey, 95, 97
noninsulin dependent
and DNA, 26–27
polygenic classification, 32
studies' biases, 3–4
twins studies, 3
and vision disorders, 375–76
Diet
and coronary heart disease, 5
impact on health, 85
and neural tube defects, 9
Diptheria
trends in, 92–93
Disability
benefit programs
public attitudes toward, 100
data, 99–101
indigent, 99
time series measurements, 84
see also Illness and disability
see also Vision disorders
Disease
distribution
environmental influences on, 1
genetic susceptibility
see Genetic epidemiology
illness-associated products
excise taxes on, 129
measure of morbidity, 87
risk factors
cultural transmission of, 1
and social networks, 416
Disease prevention
federal policies, 220
see Health promotion and disease prevention at the worksite
Diseases
preventable
costs of, 239–40
DNA
and disease susceptibility, 38
and leukemia, 15
mitochondrial
and human disease, 37
and molecular genetics, 43
and pedigree analysis
genetic susceptibility, 33
recombinant techniques
in genetic research, 26
Down's syndrome
genetic studies, 43
genetic susceptibility, 7–8
and whether to screen for, 159
Drugs
as a medical technology, 267
and neural tube defects, 9
Drug-abuse
programs at the worksite, 250

E

Ear
rates of disease in, 93
Economic incentives for health
conclusion, 129–30
income enhancement or reduction, 110–16
introduction, 107–8
price changes, 116–29
types and characteristics of economic incentives, 108–10
Economy
and public hospitals, 54
Elderly
and health indicators, 88
health promotion programs, 228
poor
care of in 1930's USA, 59
and social networks, 415
and stress studies, 324
and vision disorders, 369, 381
Electroencephalograms
and alcoholism
genetic susceptibility, 11
Emergency care
and hospital commission report data, 74
and the urban public hospital, 76
Employer
as variable risk predictor
in coronary heart disease, 422
Employment
and health, 448
Environment
chemical wastes
and health behavior, 220
familial clustering of disease, 25–26
and familial Down's syndrome, 8
and football injuries, 171
heritability studies, 20
and HLA associated diseases
influences on, 40
and intrauterine effects, 38
monitoring health concerns, 237
neural tube defects, 8
pollution taxes, 126
regulation of factors influencing health, 223
and stress, 321, 323–25
toxic and carcinogenic chemicals
and vision disorders, 382
transmission of disease, 17–32
Environmental index
in path analysis, 24
Epidemiologic studies
and cancer, 11
Epilepsy
childhood brain tumors, 16
children of epileptics, 38
and the developing fetus, 36
and genetic susceptibility, 9–10
Episodic care programs
as alternative to general hospital, 71
Ethnic minorities
health studies, 91
and myopia, 371
relocation from rural to urban, 61

Exercise
impact on health, 85
lack of
and health problems, 243–45
as risk factor
in health measures, 88
Exercise programs
and increased productivity at the worksite, 108

F

Familial aggregation
genetic epidemiology
approaches for assessing, 1
studies, 2
Familial clustering
causes of, 17–32
cultural transmission, 25–26
Familiarity
study conclusions, 16–17
Family
problems
and disease rates, 421–22
and the Social Network Index, 416
Fatigue
and Type A behavior, 359–60
Federal aid
Commission of Public Hospitals findings, 76
to hospitals
cutbacks, 79
Fetal monitoring
and birth outcome studies, 283
Fitness programs
see Health promotion
Food and Drug Administration
drug safety requirements, 268
Football
injury rate, 167–76

G

Genetic epidemiology
adoption studies, 21–24
analysis of maternal effects, 36–38
birth defects, 7–9
cancer, 11–12
cardiovascular disease, 4–6
causes of familial clustering, 17–32
conclusion, 43–44
determining how genetic susceptibility is inherited, 32–42
diabetes, 2–4
evidence for familiarity, 2–17
identifiable genotypes and susceptibility, 26–27
introduction, 1–2
leprosy, 6–7
linkage analysis, 38–40
modes of inheritance
summary, 42
neurological and behavioral disorders, 9–11
path analysis, 24–25
pedigree analysis, 33–35
polygenic models, 32
sib pair and related methods, 40–42
twins studies, 17–19
Genetic inheritance
of disease susceptibility
investigating mechanisms of, 1
Genetic susceptibility
how inherited, 32–42
and Type A behavior, 355
and vision disorders, 370–74
Genitourinary disorders
disease rates, 93
Genotypes
identifiable
disease susceptibility, 26–27
Germinal mosaicism
and Down's syndrome, 8
Glaucoma
see Vision disorders
diseases
Glucose-6-phosphate dehydrogenase (G6PD) deficiency
and genetic epidemiology, 27–28
Glucose tolerance
and coronary heart disease, 4
Glucose tolerance tests
as criterion for diabetes, 99
and increased diabetes diagnosis, 86
Government
drug safety requirements, 268
local
health service management in, 66–67
and medical care responsibility, 54–55
Grave's disease
and HLA antigens, 31
Gymnastics
injury rate, 167–68, 177–78

H

Health
see also Economic incentives for health
Health and Hospital Corporation (HHC)
as solution to urban hospital plight, 69
Health behavior
modifying and developing, 215–30
frameworks to organize literature, 216–24
introduction, 215–16
time and place strategies, 224–29
and life transitions, 219
Health care
for the poor and indigent, 53–56
and government supervision, 56
in the US 1920, 56
Public Works Administration, 60
Health care insurance
arisk rating in, 118–19, 125, 128
Health care systems
government operation of, 66
Health care utilization
long term trends, 84
Health centers
neighborhood
as solution to urban hospital plight, 69–70
Health insurance
and hospital cost factors, 209
Health Maintenance Organizations (HMO)
ambulatory care studies, 119
and the urban public hospital, 76
Health promotion
and disease prevention at the worksite
conclusion, 263
cost effectiveness, 261
evaluation of programs, 258–60
growth of programs, 249–62
health risks, 239–40
introduction, 2337–38
lack of exercise, 243–45
major health risks, 240–45
nutrition, 246–49
obesity, 247–49
program examples, 251–54
smoking, 242–43
use of incentives to change behavior, 249
Health promotion studies
results in the workplace, 111
Health risks
from standpoint of the employer, 239
Health services
use of as indicator of health, 88

Health statistics
and changes in national health, 101
long-term stability, 85
relative to health status, 85
temporal variations in, 84
Health surveys
accuracy of, 101
problems with, 95
Health workers
wage rates, 195
Hearing ability
Galludet Hearing Scale, 99
Hearing loss
national statistics trends, 86
Heart disease
as chronic illness, 237
National Health Interview Survey, 95
reduction in mortality rates, 89
Heart transplantation
and risk of dying, 403
and survival analysis, 397
Hemochromatosis
and HLA antigens, 30
Hemophilia
and genetic susceptibility, 10, 34
Heredity
and blood pressure, 6
Heritability studies
and genetic epidemiology, 19–20
High blood pressure
and coronary heart disease in familial aggregation, 4
as major health risk, 240
self help programs, 114
Hispanic populations
see Ethnic minorities
HLA genes
polymorphism of, 41
Hodgkin's disease
and familial aggregation, 41–42
and genetic epidemiology, 43
and genetic susceptibility, 14–15
and HLA antigens, 30
and radiation treatment of, 288
Homicide
1982 data, 89
sex differential in, 438
and stress, 239
Hormonal patterns
and stress, 429
Hospital
management
by the private sector, 78
private vs. public, 79
stay
as health indicator measures, 88
see also Community hospital
see also Local public hospital
see also Medical school hospital
see also Public hospitals
Hospitalization
and the poor, see Indigent
rates of, 101
and sex differential in use, 441
Hospitals
and budget support, 54
and civil service reform, 64
and efficiency incentives health insurance, 120
and federal aid, 75
and fiscal stress, 75
handicapped, 59
mental, 59
and occupancy rates, 201
physician owned, 195–96
and rate control, 209
as teaching institution, 60–61
teaching and research, 206–07
trends in public services, 55
tuberculosis, 59
Hospital cost functions
background, 193–94
conclusion, 210
methods of estimating, 196–99
overview of, 194–96
results of current work, 199–210
Host resistance
and infectious disease, 27
Hostility
and cancer, 331
and cardiovascular disease Type A behavior, 354
as risk factor for heart disease, 328
Housing conditions
and social networks, 415
Human leukocyte antigen (HLA) system
and diabetes, 3
genetic epidemiology, 29–31
genetic susceptibility to leprosy, 7
and geographical clustering, 30
typing
and polygenic models of disease, 32
Huntington's chorea
and genetic transmission, 37
Hypercholesterolemia
familial
and coronary heart disease, 5
and inherited susceptibility, 35
and linkage analysis genetic research, 40
Hyperlipidemia
and coronary heart disease in familial aggregation, 5
Hyperopia
see Vision disorders
Hypertension
and antihypertension drugs, 290
and coronary heart disease, 5
free medical programs in the workplace, 115
and health awareness trends, 86
as major health risk, 240
and National Health and Nutrition Survey, 91
Hypertensive heart disease
and trends data, 92
Hypophosphatemia
and genetic inheritance, 34

I

Illegal aliens
and health care, 75
Illness behavior
and sex differential, 442
Illness and disability
interpreting trends in: health statistics and status
conclusion, 103
disability, 99–101
illness trends, 90–99
indicators, 86–89
introduction, 83–86
mortality, 89–90
other considerations, 101–3
Illness trends
and direct physical examination, 90–99
Immigrant populations
and free medical care, 60
Immune response
and ragweed allergy, 40
Immune system
and HLA antigens, 31
Immunization
analysis of program, 155
program costs, 156
Indigent
AHA-Urban Institute Study, 77
disability, 99
in England, 55
in Germany, 55
and health care, 53–80

and the legal system, 57
national health care system, 80
and the "worthy" poor, 57
Infant mortality
1982 data, 89
Infants
and vision disorders, 379–80
Infectious disease
National Health Interview Survey, 93
Influenza
epidemics 1960–1980, 93
Inheritance
and diabetes, 3
Insulin therapy
and familiality in diabetes, 3
Insurance
and health incentives, 109
health risk factors, 117
Insurance agents
and heart disease mortality rates, 332
International Classification of Diseases (ICD)
and medical coding procedures, 98
specification of coding system, 87
Intimacy
and physical health, 427

J

Job dissatisfaction
and stress, 323
Jogging
and attributed risks, 187

K

Kuru disease
relation to genetics, 25

L

Larynx cancer
and relation to nasopharyngeal cancer, 14–15
Lawyers
and heart disease mortality rates, 332
Learning disabilities
effects of screening programs, 153
and vision disorders, 380
Legal system
and the poor, 57
Leprosy
and genetic epidemiology, 43
and genetic inheritance, 6–7
and HLA antigens, 30
Leukemia
familial aggregation, 15
and genetic epidemiology, 43
and genetic susceptibility, 12
Life expectancy
and biological life span, 90
and blindness, 380–81
as a health status indicator, 86
and mortality rates, 434
and Surgeon General's report, 89
Life span
and health enhancement, 215–216
and public health, 223–29
Lifestyle
and disease, 17
see also Sex differential
Linkage analysis
and genetic transmission of disease, 38
Lipoproteins
genetic heritability, 24–25
twins heritability studies, 19–20
variation
and polygenic model of susceptibility, 32
Lipoprotemia
and high cholesterol, 35
Local public hospital
early developments and recent trends in the evolution of
decline of the urban, 61–64
definition of, 53
early roots, 55–58
overview, 53–55
perceived problems and proposed solutions, 64–80
rise of, 57–61
Lod score
as evidence for linkage genetic research, 39
Lung cancer
and chronic illness, 237
environmental exposure, 26
epidemiologic investigations, 43
and genetic susceptibility, 13–14
and nasopharyngeal cancer, 14–15

M

Malaria
and G6PD deficiency, 27
and genetic epidemiology, 27, 43
Manic depressive disorder
genetic transmission studies, 22
Marriage
and coronary heart disease studies, 6
and health, 447–48
and sex differential in lifestyle, 446
and the Social Network Index, 416
and social networks, 425–26
Maternal age
and neural tube defects, 9
Maternal effects
analysis of
in genetic epidemiology, 2, 36–38
and pyloric stenosis, 37
Measles
trends in, 92–93
Medicaid
cutbacks, 75
effect on public hospitals, 68
and government financing of hospitals, 194
hospital commission report data, 75
Medical devices
and laws regarding safety, 269
Medical insurance
and acceptable technology, 270
Medical practice
changes in
and disease rates, 102
Medical school hospitals
conflict with municipal hospital, 71–72
effect on public hospitals, 63, 65
Medical technologies
evaluating the safety and efficacy of
conclusions, 287–91
cross-cutting methodological issues, 282–87
dissemination, 290–91
introduction, 267–71
organizations for assessing, 270–71
methods for assessing in clinical use, 271–82
strategic considerations, 287–91
surveillance, 273–74
Medicare
see Medicaid
Medicine
prospective
and health behavior, 217
Men
as bankers
and stress, 332

and cardiovascular disease
Type A behavior, 349
coronary heart disease, 4
heritability of risk factors for, 19–20
and death related to violence, 89
diabetes, 98
frequency of phyloric stenosis, 37
and health risk factors, 241
and hearing loss, 99
and hypercholesterolemia, 35
hypertension, 91
life expectancy, 89
and mortality risk, 425
and smoking, 262
and the Social Network Index, 417
sports injuries rates, 169
twins studies
environmental factors, 20
see also Sex differential
Mental disorders
and disability statistics, 84
Mental retardation
and phenylketonuria (PKU), 28
Meta-analysis
and the safety of medical technology, 279
Mitochondrial genome
and human disease, 37
Mobile clinics
and data collection, 90
Molecular biology
and cancer research, 15
Morbidity
and social networks, 419
see Sports and recreation
Mortality
and depression, 331
and lifestyle, 222
and marriage, 425–26
measures, 87
recent declines in, 85
risk
and social support, 416–18
and social networks measures, 416
and survival statistics, 390
in the workplace

N

Nasopharyngeal cancer
and genetic epidemiology, 43
and genetic susceptibility, 14–15
National Association of Public Hospitals (NAPH)
and health care, 78
National Center for Health Statistics
and disability data, 83
National Commission on Social Security Reform
mortality rates, 90
National health insurance
and the public-general hospital, 76
National Health and Nutrition Examination Survey
data results, 90–91
National health planning
and Commission on Public Hospitals findings, 77
National immunization and screening programs
and decision analysis, 136
Natural disasters
and stress, 324
Neural tube defects
and genetic inheritance, 8
screening program for, 139
Neuroendocrine activity
and stress, 323
Neurological disorders
adoptive studies, 21–23
and familial clustering, 1
Nutrition
and business trends, 112
and myopia, 371
as risk factor
in health measures, 88
and worksite health behavior, 246–49

O

Obesity
and morbidity rates
in women, 444
and worksite health programs, 247–49
Organizational behavior
and interventions in health, 217
Ovarian cancer
and breast cancer risk, 36, 40
Overweight
control programs and relapse, 114
Outpatient activity
as a product of hospitals, 205

P

P3 brain waves
and alcoholism, 10
Paralysis
National Health Interview Survey, 95
Parenthood
and health, 448
Path analysis
and disease distribution, 1
in genetic studies, 24–25
Pedigree analysis
and genetic susceptibility, 33–35
Pernicious anemia
and ABO blood groups, 29
Peptic ulcer
as a chronic condition, 95
and steroids, 285
Phenylketonuria (PKU)
genetic studies, 43
and genetic transmission, 28
maternal
cardiac anomalies, 36
intrauterine growth retardation, 36
microcephaly, 36
Philadelphia chromosome
chronic myelocytic leukemia, 15
Physician
behavior
sex differential in treatment, 443–44
staffing patterns and hospital costs, 199
Physicians
and heart disease mortality rates, 332
Pilondial cysts
and inherited neural tube defects, 8

Polio
epidemiologic investigations, 43
Pollution
industrial
and government regulation, 126
Polydactyly
and genetic inheritance, 38
Polygenic models
analysis of
in genetics, 2
and genetic susceptibility, 32
Polyposis coli
and colon cancer, 12
the Poor
see Indigent
Poorhouses
medical care quality, 58
USA 1870–1930, 57
Population
sociodemographic fluctuations in, 85
Prohibition
and alcohol control, 298
Pregnancy
see Women
Presbyopia
see Vision disorders
Project Health
as alternative to general hospital, 70
Psychiatric epidemiology
and disability statistics, 84
Psychology
and interventions in health, 217
Public administration
and local hospitals, 54
Public-general hospital
AHA data on, 73
Public health law
in California, 58
in England, 55
in Germany, 55
Public health/public hospital merged system
as solution to urban hospital plight, 69–70
Public hospitals
criticism of, 65
and federal assistance, 59–60
government operation
effects of, 64
and managerial critiques, 64
workhouse origins, 58
Public policy decisions
and American health social programs, 83
Public Works Administration
and federally assisted health care, 60
Pulmonary function
and genetic susceptibility to cancer, 14
Pyloric stenosis
and genetic susceptibility, 32
as a maternal effect, 37

R

Racket sports
injury rates, 180–81
Radiation
and leukemia, 16
Ragweed allergy
genes and environmental influences, 40
Renal disease
and coronary heart disease
familial asociation, 5
Research methods
concordance
in twins studies, 17–19
Respiratory disease
National Health Interview Survey, 97
Retinoblastoma
and genetic susceptibility, 12
Retirement
and employer based disease prevention programs, 111
Rheumatic disease
and ABO blood groups, 29
Rickets
D resistant
and genetic inheritance, 34
Rockefeller Foundation
grants to medical schools, 65
Rural public-general hospital
AHA data on, 73

S

Safety
definition of in medical technology, 267
Sarcoma
and genetic susceptibility, 12
Schizophrenia
diagnostic criteria for, 9
and dialysis cure, 288
and genetic epidemiology, 43
and genetic susceptibility, 9
heritability
adoptive studies, 21
path analysis in, 25
Scoliosis
and inherited neural tube defects, 8
Segregation analysis
in genetics
see Pedigree analysis
Seizure disorders
familiality of, 38
Self-assessment
and Type A behavior, 355–56
Self-esteem
and stress, 323
Senile macular degeneration
see Vision disorders diseases
Senility
and vision disorders, 369
Sensitivity analysis
and soft data in health, 135, 145–46
Serum lipid levels
and coronary heart disease
in familial aggregation, 4
Sex differential
in morbidity, mortality, and lifestyle, 433–53
introduction, 433–34
in lifestyle and health, 446–52
in morbidity rates, 441–46
in mortality rates, 434–41
summary, 453
Sex discrimination
and insurance premiums, 117
Sib pair analysis
and genetic research, 40–42
Sickle cell anemia
genetic studies, 43
and malaria, 27
and recessive inheritance, 33
Simple meiotic nondisjunction
and Down's syndrome, 7
Skin disease
National Health Interview Survey, 97
Sliding fee scale
in health care, 56
Smoking
annual cost to business, 111
and blood pressure, 241
cigarette price and consumption, 109
and coronary heart disease
in familial aggregation, 4
and education, 242
and health, 449–50
and incentives program, 113–14, 249
and lung cancer, 13–14
quitting
sex differential in, 446
reduction in, 85
and resultant diseases, 242
as risk factors
in health measures, 88
and savings to employers, 261
and stress, 330
and survival analysis, 397
Social networks and social support

definition of and measurement, 414–15
discussion of findings, 426–27
functions of social ties, 427–28
pathways linking social networks supports to disease, 428–30
social networks and support, 416–26
Social Security
debate over retirement, 90
Social Security Act of 1935
health provisions of, 59
Spina bifida
and genetic inheritance, 8
Sports and recreation
mortality and morbidity from injuries in
introduction, 163–65
overall mortality and morbidity, 165–66
public health perspective, 187–89
and safety commision, 164
select community sports, 171–80
select groups, 167–71
select unorganized sports, 180–87
snow and ice activities, 182–84
water sports, 181–82
Sports injuries
professional vs. amateur, 165
rate compared to malignancy and heart disease, 163
State legislation
and health care, 54
Steroids
and peptic ulcers, 285
Stimulation
and stress, 322
Stomach cancer
and ABO blood group, 28
Strabismus
see Vision disorders'
Stratification
in survival analysis, 396–97
Stress
and blood pressure, 328–30
and coronary heart disease, 5
definition of, 320
fiscal
and hospital efficiency,
and health, 319–335
concept and scope of review, 320–21
conclusion, 335
"good" stress, 321–23
illustrative research on stress and disease, 327–35
introduction, 319–20
measures of distress as risk factors, 327
methodological concerns, 323–27
stressful life events, 333–34
and health statistics, 84
and hormonal patterns, 429
and life span transitions, 228
and the workplace, 331–33
Stress management
programs at the worksite, 250
Stroke
as chronic illness, 237
and coronary heart disease familial association, 5
Suicide
1982 data, 89
and stress, 239
Surgery
for myopia, 371
and panel assessment, 278
see also Transsexual surgery
Survival data
statistical analysis of, 385–409
comparison of survival curves, 391–98
conclusion, 408–09
definition of, 306
diagnostics, 405
estimation of a survival curve, 386–91
history of, 385
model building, 403–05
multiple event times and types, 405–08
product limit estimator, 387–88
relative risk regression, 399–405
special cases, 401–03
Sympathetic adrenal medullary (SAM)
and cardiovascular disease, 353
endocrine responses to, 335

Trend analyses
and feasibility in health statistics, 85–86
Triglycerides
in coronary heart disease, 5
Tuberculosis
screening program analysis, 281–82
Tumor formation
and genetic susceptibility, 11
Twins studies
alcoholism, 10
blood pressure studies, 5
cardiovascular disease, 19–20
cholesterol, 20
diabetes, 3
disease distribution
environmental influences on, 1
Down's syndrome, 7
and genetically transmitted disease, 17–19
genetic studies table, 18
heritability, 19–20
leprosy, 6
maternal effects, 38
neural tube defects, 8
Type A behavior
epidemiologic foundations and public health implications
assessment of, 344–47
conclusion, 362–63
consequences of, 358–60
etiology of, 355–58

Framingham Type A scale, 347
intervention with, 360–62
introduction, 343–44
relationship to coronary heart disease, 347–55
what is it?, 344
and health, 449
as risk factor for coronary heart disease, 329

U

Ulcerative colitis
and HLA antigens, 31
University public-general hospital
AHA data on, 73
Urban hospital
between World War I and II, 60
decline of after 1950, 61–64
New York City's affiliation plan
as economic solution, 68
underfunding of, 67–68
Urban public-general hospital
basis for unique consideration, 74
Unemployed
and Health care, 61
Unemployment
and stress, 333–34
Unions
effect of on hospital costs, 207–8
and health care promotion programs, 257
and hospital reform, 63–64
Utility scales
in decision analysis, 138, 143–45

V

Varicose veins
as a chronic condition, 95
Vision disorders
in public health, 369–82
blindness, 378
causes of, 369–74
diseases, 373–77
impact of, 378–81
introduction, 369
low vision, 377–78
prevention, 381–82

W

Weight
as risk factor
in health measures, 88–89
Widowhood
and mortality risk, 425
Women
breast cancer
as sex limited disease, 34
and cardiovascular disease Type A behavior, 349
causes of absenteeism, 238
and coronary heart disease risk, 422
diabetes, 98
hypertension, 91
lead screening programs, 153
and life expectancy, 89
maternal age
and Down's syndrome, 7
and neural tube defects, 9
maternal effects
analysis of, 36–38
maternal health care, 85
maternal illness
affecting fetus, 36
maternal mortality, 87
and multiple roles
effect on health, 450–52
and myopia, 370
neural tube defects, 8
planned pregnancy
and leukemia risk, 331
and pregnancy complications in, 423–24
prenatal health behavior
public health programs, 224–225
and rheumatoid arthritis, 444
and the Social Network Index, 417
and social security act, 59
sports injuries rates, 169
twins studies
and genetic transmission of disease, 20
and Type A behavior, 359
in their male offspring, 357–58
